

# CERTIFYING PROVIDER COMPENSATION AGREEMENT PROPOSAL

## Summary

The proposal amends existing law to clarify which practices are permissible for certifying providers and licensees regarding compensation agreements. These clarifications are an effort to better protect against undue influence in provider-patient relationships that involve medical cannabis treatment. The provisions:

- Prohibit a certifying provider from receiving compensation from certain entities affiliated with a licensed grower, processor, or dispensary without Commission approval;
- Prohibit a grower, processor, or dispensary from receiving compensation from a certifying provider without Commission approval; and
- Expressly outline certain events which are permissible for a certifying provider to participate in without Commission approval.
