

# Storing Cannabis Safely

## Tips to protect your family, children, and pets:

### Keep cannabis:

- Out of sight.
- Out of reach.
- Locked up.
- In its original packaging so the THC warning symbol is easily seen.

## What happens if my child consumes cannabis?

- Your child may have trouble walking, sitting up, appear sleepy, or have trouble waking up or breathing.
- If you think your child consumed cannabis, call the Maryland Poison Center at (800) 222-1222 or go to an emergency room right away. Poison Center calls are free and confidential.

## What if my pet consumes cannabis?

- Your pet may drool more than usual, seem confused, or lose control of their bladder or balance.
- Depending on the ingredients, there may be additional health concerns for pets. For example, chocolate in edibles can be toxic for dogs.
- If you think your pet consumed cannabis, call your veterinarian or the ASPCA Animal Poison Control Center (APCC) at (888) 426-4435.

## What if I consume too much cannabis?

- You may feel extreme confusion, paranoia, anxiety, panic, hallucinations, disorientation or delusions, increased blood pressure, fast heart rate, shortness of breath, shaking or severe nausea.
- If you are very sick, call the Maryland Poison Center at (800) 222-1222 or go to an emergency room right away.
